What goal is this solution appropriate for?

This strategy is suitable for the short-term essential goals of private investors where a specific, more predictable outcome is required. The private investor requires a high probability of achieving a specific capital amount at the end of a 12-month investment horizon or longer. The essential priority of the goal means the private investors' risk capacity for not achieving the outcome is low.

This solution is designed:

- to deliver a return more than the SteFI Composite Index
- to deliver a return of inflation or higher with a 90% probability over a rolling 12-month investment horizon
- not to lose capital over a rolling 12-month period

The portfolio may from time to time invest in listed and unlisted financial instruments, in accordance with the provisions of the Act, and the Regulations thereto, as amended from time to time, to achieve the portfolio's investment objective. The manager may only include the following unlisted financial instruments for efficient portfolio management purposes: forward currency, interest rate and exchange rate swap transactions. The Trustee shall ensure that the investment policy set out in this Supplemental Deed is carried out. The manager shall reserve the right to close the portfolio to new investors on a date determined by the manager. This will be done to be able to manage the portfolio in accordance with its mandate. The manager may, once a portfolio has been closed, open that portfolio again to new investors on a date determined by the manager.
