

INVESTMENT OBJECTIVE

The **Anchor BCI Core Income Fund** aims to preserve capital whilst providing income returns.

INVESTMENT PHILOSOPHY

The Anchor BCI Core Income Fund aims to preserve capital, whilst providing income returns higher than those offered by traditional money market portfolios. Investments to be acquired for the portfolio may include assets in liquid form, money market instruments, bonds, fixed deposits, floating-rate instruments, and other interest-earning instruments. The portfolio may also invest in participatory interests and other forms of participation in portfolios of collective investment schemes, registered in South Africa as well as other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and trustee, and of a sufficient standard to provide investor protection at least equivalent to that in South Africa and which is consistent with the portfolio's primary objective. The portfolio may from time to time invest in listed and unlisted financial instruments, in order to achieve the portfolio's investment objective.

FAIS CONFLICT OF INTEREST DISCLOSURE

Please note that your financial advisor may be a related party to the co-naming partner and/or BCI. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid by portfolio to BCI, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/ managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable. In some instance portfolios invest in other portfolios which forms part of the BCI Schemes. These investments will be detailed in this document, as applicable. Boutique Collective Investments adopted the ASISA Standard on Effective Annual Cost ("EAC"). The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at www.bcis.co.za. BCI calculates the EAC as per the ASISA standard for a period of 3 years up until the most recent TER reporting period.

DISCLAIMER

Boutique Collective Investments (RF) (Pty) Ltd ("BCI") is part of the Apex Group Ltd. BCI is a registered Manager of the Boutique Collective Investments Scheme, approved in terms of the Collective Investments Schemes Control Act, No 45 of 2002 and is a full member of the Association for Savings and Investment SA. Collective Investment Schemes in securities are generally medium to long term investments. The value of participatory interests may go up or down and past performance is not necessarily an indication of future performance. The Manager does not guarantee the capital or the return of a portfolio. Collective Investments are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees, charges and maximum commissions is available on request. BCI reserves the right to close the portfolio to new investors and reopen certain portfolios from time to time in order to manage them more efficiently. Performance figures quoted for the portfolio are from Morningstar, as at the date of this document for a lump sum investment, using NAV-NAV with income reinvested and do not take any upfront manager's charge into account. Income distributions are declared on the ex-dividend date. Actual investment performance will differ based on the initial fees charge applicable, the actual investment date, the date of reinvestment and dividend withholding tax. Investments in foreign securities may include additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Should the portfolio invest into another Anchor BCI co-named portfolio, the investing fund will be reimbursed for any net investment management fees incurred by the investment so that there is no additional fee payable to Anchor.

Certain investments - including those involving futures, options, equity swaps, and other derivatives may give rise to substantial risk and might not be suitable for all investors. Income funds derive their income from interest-bearing instruments in accordance with Section 100(2) of the Act. The yield is a current yield and is calculated daily. Boutique Collective Investments (RF) Pty Ltd retains full legal responsibility for the third party named portfolio. Although reasonable steps have been taken to ensure the validity and accuracy of the information in this document, BCI does not accept any responsibility for any claim, damages, loss or expense, however it arises, out of or in connection with the information in this document, whether by a client, investor or intermediary. This document should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of BCI/the Manager's products. Access the BCI Privacy Policy and the BCI Terms and Conditions on the BCI website (www.bcis.co.za).

FUND MANAGER COMMENTARY AT 31 OCT 2025

The US economy is sending mixed signals. Growth indicators are strengthening even as the US labour market continues to soften on both the demand and supply sides. Labour input has stalled, job openings are moderating, and employment is becoming increasingly difficult to secure. Meanwhile, output appears to be accelerating, supported by gains in industrial production, capital goods orders, and consumer spending. This divergence between a softening labour market and resilient real spending is unlikely to be sustainable - unless productivity is rising, which indeed seems to be the case. The growing adoption of artificial intelligence (AI) is enabling firms to expand output while maintaining a low-hiring, low-firing posture. Economic theory suggests that policymakers should accommodate such a positive supply shock with lower interest rates, allowing demand to "catch up" with the supply side of the economy. However, for this to materialise, US inflation would need to decline sufficiently for the US Federal Reserve (Fed) to be confident that productivity has shifted to a higher structural growth path—an outcome we expect. Consequently, the US Treasury curve is likely to continue steepening. Domestically, inflation expectations are being recalibrated lower following recent statements by the National Treasury and the South African Reserve Bank (SARB) reaffirming their commitment to a lower inflation target. This has driven a notable downward shift in the breakeven curve this year, with the 10-year breakeven rate currently at 4.3%. In the derivatives market, current pricing implies that the local policy rate may bottom out at around 6.5%. To continue taking advantage of the high policy rate environment, over 90% of the portfolio is allocated to floating-rate notes. To partially mitigate the decline in income as the policy rate falls, the portfolio includes inverse floaters, managed within strict duration parameters. The portfolio's average life is 3.6 years, with a weighted average credit spread of 1.56%. In an environment where credit spreads continue to tighten, the Fund has been able to maintain its credit spread. Approximately 85% of the Fund's holdings are AAA and AA-rated instruments, ensuring low credit risk. The Fund continues to harvest low-risk credit premiums. Its primary objective remains capital preservation while delivering income returns that exceed those of traditional money market portfolios.

FEE DETAILS

	Class A
Initial Fees (BCI) (Incl. VAT)	0%
Annual Management Fee (Incl. VAT)	
Class A	0.63%
Performance Fee	None
TER and Transaction Cost (Incl. VAT)	
Basic	Jun 25: 0.65% (PY) 0.65%
Portfolio Transaction Cost	Jun 25: 0.00% (PY) 0.00%
Total Investment Charge	Jun 25: 0.65% (PY) 0.65%

A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. The TIC should not be considered in isolation as returns may be impacted by many other factors over me including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31 December 2024, whilst the underlying portfolios ratio and cost calculations are based upon their most recent published figures, being 30 June 2025.
