

INVESTMENT OBJECTIVE

The BCI Contrarius Global Balanced Feeder Fund aims, over the long-term, to earn a higher total rate of return than an absolute return.

INVESTMENT POLICY

The portfolio will, apart from assets in liquid form, invest solely in Fixed Fee Class shares of Contrarius Global Balanced Fund, a sub-fund of Contrarius ICAV, domiciled in Ireland. Contrarius Global Balanced Fund is an actively managed flexible asset allocation fund that may invest in global equities and equity related securities, investment grade fixed-income securities, commodity-linked instruments and cash. It has the flexibility of reducing its exposure to global equities through stock market hedging. It may vary its net exposure to global equities between 0% and 75%. To the extent that the assets in the portfolio are exposed to exchange rate risk, the manager may enter into financial transactions for the exclusive purpose of hedging such exchange rate risk subject to the conditions and limits as stipulated by the Act.

RISK PROFILE

Moderate - High Risk

- This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long-term investment returns could therefore be higher than a medium risk portfolio.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- The portfolio is exposed to equity as well as default and interest rate risks.
- Therefore, it is suitable for medium to long-term investment horizons.
